

MICHAEL CURTIS
ELECTIONS COMMISSION CHAIR

**STATE OF HAWAII
ELECTIONS COMMISSION**

NOTICE OF ELECTIONS COMMISSION MEETING

Date: Tuesday, January 16, 2024

Time: 1:00 p.m.

Place: via Video Conference or Telephone*

*Pursuant to Section 92-3.7, Hawaii Revised Statutes, the Elections Commission will be meeting remotely using interactive conference technology. The public may view the video and audio of the meeting through the following video conferencing link:

Video: <https://us02web.zoom.us/j/89189632728>

Telephone:	+1 346 248 7799	+1 564 217 2000
	+1 253 215 8782	+1 646 931 3860
	+1 669 444 9171	+1 929 205 6099
	+1 669 900 6833	+1 301 715 8592
	+1 719 359 4580	+1 309 205 3325
	+1 386 347 5053	+1 312 626 6799
	+1 253 205 0468	+1 689 278 1000
	+1 305 224 1968	+1 360 209 5623
	+1 507 473 4847	

Meeting ID: 891 8963 2728

The public may also attend the meeting at the Office of Elections, 802 Lehua Avenue, Pearl City, Hawaii 96782, where an audiovisual connection will be provided for the public to view and participate in the meeting.

In the event audiovisual communication cannot be maintained with all Commissioners participating in the meeting, the meeting shall be automatically recessed for up to thirty (30) minutes to allow staff to attempt to restore communication.

If, however, audiovisual communication cannot be restored, please go to <https://elections.hawaii.gov/about-us/boards-and-commissions/elections-commission/> for more information including reconnection instructions.

MEETING INFORMATION:

Public Testimony

Pursuant to Section 92-3, Hawaii Revised Statutes and Section 3-170-11, Hawaii Administrative Rules, oral testimony may be limited to three (3) minutes at the discretion of the presiding officer and will be accepted only on matters directly related to the board agenda. Generally, each agenda item is addressed (and testimony received) in the order listed in the agenda; however, agenda items may occur out of order without notice and testimony is not accepted for completed agenda items. The Board agenda and meeting materials for this meeting are also made available for inspection on the Elections Commission website at: <https://elections.hawaii.gov/about-us/boards-and-commissions/elections-commission/>.

Written Testimony

Pursuant to Section 3-170-11, Hawaii Administrative Rules, to ensure the public, as well as its board members, receive such testimony in a timely manner, written testimony should be submitted no later than two workdays prior to the scheduled meeting date and time. Any written testimony submitted after such time cannot be guaranteed to be distributed in time for the meeting. Written testimony may be submitted by one of the methods listed below:

- By email to: elections@hawaii.gov
- By U.S. Postal Mail: 802 Lehua Avenue, Pearl City, Hawaii 96782
- By facsimile to: (808) 453-6006

Written Testimony submitted to the Elections Commission will be made a public record and any contact information contained therein will be available for public inspection and copying. Please do not include information in your testimony that you do not want disclosed to the public.

For Further Assistance

If you require special assistance or auxiliary aids and/or services to participate in the public hearing process of the Elections Commission, please contact the Office of Elections at (808) 453-8683 or toll free at 1-800-442-8683 or email elections@hawaii.gov as soon as possible. Requests made as early as possible will allow adequate time to fulfill your request.

[RE Drop Box Info 2020 election .msg](#)

1. CHAIN OF CUSTODY (Purpose: Security against tampering of ballots)

HAR §3-177-453 requires a complete count of ballots be maintained through chain of custody to ensure the accountability and security of all ballots. In his February 10, 2021, Biennial Evaluation of Elections Operations, Scotty Anderson, Chair of the Elections Commission, recommended prioritization of “Verifiable chain of custody of ballots at every stage of transportation and handling...” This was also identified as an item of concern during the December 15, 2020, Elections Committee meeting where “Commissioner Koller stated that CEO Nago does not seem concerned with chain of custody regarding the drop boxes.”

The Office of Elections has failed to implement the lawful requirements of HAR § 3-177-453 (Accountability and Security of Ballots) - yet they still certified the 2022 Primary and General Election without chain of custody documentation nor the ability to ensure the accountability of all ballots. The County of Kauai and the other Counties do not keep chain of custody documentation nor acknowledge that they are legally obligated to do so. During the weeks long mail-in election, Counties send, receive, and hold ballots with no inventory controls.

Signature verification does not prove chain of custody. When ballots are handed from the Counties to the State to be counted, there is no official transfer record. The number of ballots distributed and received by a County should be declared before those ballots are handed over to the State and cross referenced to the State counts of the Counties ballots.

The Office of Elections website states under questions about Election Security: “How do you ensure election officials don’t throw away ballots?”

Without chain of custody documentation, the answer to this question is that - **We cannot ensure that election officials don’t throw away ballots.** Chain of custody, from production (printing) through distribution, through collection during voting is a lawful requirement. The attachments document the lack of chain of custody and election officials’ indifference to following the law. Please read the attached e-mail chains from the bottom up. An investigation into Office of Elections maladministration of the lawful requirement of HAR §3-177-453 is warranted.

Thank you, Lyndon, Per the General election Summary Report there were 2350 in person ballots cast. 2350 ballots cast in person plus 28,352 cast via drop box and mail totals to 30,702 ballots. The County of Kauai reported 34,081 ballots counted. Where did the extra 3,379 ballots come from? How were they received please provide chain of custody for those also.

The updated counts are below. As stated previously these rough manual counts that are only used to gauge work flow and to assist in allocating resources.

Additionally, please note the following:

- The “No. Pulled” column represents the number of envelopes that were pulled for the day because they were unsigned or contained a non-matching signature;
- The “Received Manually” column represents the number of envelopes that were added back into the count because the envelope issue (i.e., missing or non-matching signature) which initially caused the envelope to be pulled was cured by the voter (i.e., signed and signature verified); and
- Individual counts for 7/28/22 and 7/29/22 were misplaced so only the Total is provided for those dates.

Subject: RE: Daily Auditable Accounting of Ballots Received Via Drop Box and USPS 2022 Primary Election

Current ballot envelope manual hand-counts are depicted below. Envelopes from the different sources were mixed up on 7/28 and 7/29 so only a total is reported. However, the bulk did come from the USPS. As stated previously these manual counts are only used to gauge work flow and resource allocation.

Also, attached are our procedures for collecting ballots from drop boxes.

Date	Hanalei NC	Princeville Library	Kilauea NC	Waipouli SC	Elections Division	Kōloa NC	Kalāheo NC	Hanapēpē NC	Waiimea NC	USPS	Office	VSC	
7/28/22													843
7/29/22													1,062
7/30/22	0	0	2	1	26	2	3	1	4	851	0	0	890

8/2/22	3	4	0	7	62	2	1	0	1	778	12	4	874
8/3/22	0	0	0	0	53	0	0	0	0	1,084	12	0	1,149

To: Lyndon Yoshioka <lyoshioka@kauai.gov>; Jade Tanigawa <jtanicgawa@kauai.gov>
Subject: Daily Auditable Accounting of Ballots Received Via Drop Box and USPS 2022 Primary Election

Lyndon and Jade please provide a daily auditable accounting of Ballots received from Registered Voters via drop box and USPS for the 2022 Primary Election.

The list should include but not limited to:

- Daily number of ballots received from each drop location and total ballots received per day from the USPS.
 - Daily USPS receipt of ballots delivered, and the County verification of daily USPS ballot counts with proper chain of custody forms.
 - Number of ballots determined to be from non-Registered Voters and therefore will not be counted.
 - Numbers should be tallied to a summary spread sheet and be auditable to chain of custody records for each drop box location and daily USPS deliveries.
- Drop Box plus USPS plus in person voting equal State of Hawaii official results

I look forward to working with you both and to help with your continued efforts to ensure safe and secure elections.

Lydon, Jade, I need to let the public know about this. I do not think it is possible to miscount (or not count) 1 out of every 10 envelopes that was received by your office. **The counts taken were intended to provide our office with a rough number of envelopes received so we could estimate the number of outstanding envelopes and use this count to properly allocate resources. To imply that a discrepancy in this count and the number of ballots counted is a sign that something nefarious has occurred is wrong.** Could the voting machines play a role in this discrepancy without county officials knowing? **No.**

Subject: RE: Drop Box Info 2020 election

Voted ballot envelope chain of custody:

- Voter > USPS > Election Division
- Voter > Dropbox > Election Division
- Voter > Election Division (in-person drop-off at service window)

The discrepancy is likely due to inaccurate manual envelope counts over time. I will check with staff and get back to you.

Subject: RE: Drop Box Info 2020 election

Thank you, Lyndon, Per the General election Summary Report there were 2350 in person ballots cast. 2350 ballots cast in person plus 28,352 cast via drop box and mail totals to 30,702 ballots. The County of Kauai reported 34,081 ballots counted. Where did the extra 3,379 ballots come from? How were they received please provide chain of custody for those also.

Hi Lyndon, per your e-mail below you stated that “the chain of custody process utilized by our office, including any documentation, was developed for our own internal use and is not mandated by Hawai‘i law.”

You further indicated that you only count ballots to assess workflow and allocate resources. “As stated previously these rough manual counts that are only used to gauge work flow and to assist in allocating resources.

Upon further research according to HAR 3-177-453 it appears that the county has a legal obligation to keep proper chain of custody records. Can you please advise us as to why the County has not been doing this and how it will be corrected.

The updated counts are below. As stated previously these rough manual counts that are only used to gauge work flow and to assist in allocating resources.

Additionally, please note the following:

- The “No. Pulled” column represents the number of envelopes that were pulled for the day because they were unsigned or contained a non-matching signature;
- The “Received Manually” column represents the number of envelopes that were added back into the count because the envelope issue (i.e., missing or non-matching signature) which initially caused the envelope to be pulled was cured by the voter (i.e., signed and signature verified); and
- Individual counts for 7/28/22 and 7/29/22 were misplaced so only the Total is provided for those dates.

Subject: Daily Auditable Accounting of Ballots Received Via Drop Box and USPS 2022 Primary Election

Lyndon and Jade please provide a daily auditable accounting of Ballots received from Registered Voters via drop box and USPS for the 2022 Primary Election.

The list should include but not limited to:

- Daily number of ballots received from each drop location and total ballots received per day from the USPS.
 - Daily USPS receipt of ballots delivered, and the County verification of daily USPS ballot counts with proper chain of custody forms.
 - Number of ballots determined to be from non-Registered Voters and therefore will not be counted.
 - Numbers should be tallied to a summary spread sheet and be auditable to chain of custody records for each drop box location and daily USPS deliveries.
- Drop Box plus USPS plus in person voting equal State of Hawaii official results

I look forward to working with you both and to help with your continued efforts to ensure safe and secure elections.

Lydon, Jade, I need to let the public know about this. I do not think it is possible to miscount (or not count) 1 out of every 10 envelopes that was received by your office. **The counts taken were intended to provide our office with a rough number of envelopes received so we could estimate the number of outstanding envelopes and use this count to properly allocate resources. To imply that a discrepancy in this count and the number of ballots counted is a sign that something nefarious has occurred is wrong.** Could the voting machines play a role in this discrepancy without county officials knowing? **No.**

Voted ballot envelope chain of custody:

- Voter > USPS > Election Division
- Voter > Dropbox > Election Division
- Voter > Election Division (in-person drop-off at service window)

The discrepancy is likely due to inaccurate manual envelope counts over time. I will check with staff and get back to you.

Ralph,

I don't answer legal questions for the public and I will not be investigating your legal concerns. My role is to provide legal advice to the county government. The County will comply with state statutes and rules that govern the election process. The state chief elections officers selects the voting system in accordance with HRS section 16-1 and detailed in the relevant administrative rules. My recommendation is to contact the state so they can explain the election voting system to you as that appears to be the main disconnect.

Thank you,
Matt

Subject: RE: Elections Process

CAUTION: This email originated from outside the County of Kauai. Do not click links or open attachments even if the sender is known to you unless it is something you were expecting.

Hi Matt, I am following up with my e-mail below. Could you please share the procedures the County of Kauai will use to run a Paper Ballot election in accordance with HRS 16-21 through HRS 16-29 as you described below. Also please address my questions 2,3,4,5, and 7 on my original e-mail. I am including Mel Rapozo and George Kanna on this email. My goal is to have these questions answered well ahead of the next election and communicated with the public.

16-21 Definition. "Paper ballot voting system" means the method of recording votes which are **counted manually**.

16-22 Marking. The method of marking a paper ballot shall be prescribed by the chief election officer by rules and regulations promulgated in accordance with chapter 91. The chief election officer shall prescribe a uniform method of marking the ballots in all precincts in a county and for absentee voting by paper ballot.

16-23 Paper ballot; voting. Upon receiving the ballot the voter shall proceed into one of the voting booths provided for the purpose, and shall mark the voter's ballot in the manner prescribed by section 16-22.

The voter shall then leave the booth and deliver the ballot to the voter service center official in charge of the ballot boxes. The voter service center official shall be sufficiently satisfied that there is but one ballot enclosed, whereupon the ballot shall be immediately dropped into the proper box by the voter service center official.

16-24 Count, public. Insofar as the limits of the room in which the voting takes place reasonably allow, no person shall be prevented from attending the counting of the ballots on election day, unless it is necessary to preserve the peace.

16-25 Order and method of counting. Each ballot shall be counted and finished as to all the candidates thereon before counting a second and subsequent ballots. The ballots shall be counted by teams in the following manner only: by one election official announcing the vote in a loud clear voice, one election official tallying the vote, one election official watching the election official announcing the vote and one election official watching the election official tallying the vote. The election official doing the announcing or tallying and the election official watching that official shall not be of the same political party.

16-26 Questionable ballots. A ballot shall be questionable if:

- (1) The ballot contains any mark or symbol whereby it can be identified, or any mark or symbol contrary to the provisions of law; or
- (2) Two or more ballots are found in the ballot box so folded together as to make it clearly evident that more than one ballot was put in by one person, the ballots shall be set aside as provided below.

Each ballot that is held to be questionable shall be endorsed on the back by a voter service center official with the official's name or initials, and the word "questionable". All questionable ballots shall be set aside uncounted and disposed of as provided for ballots in section 11-154

16-27 Number of blank and questionable ballots; record of. In addition to the count of the valid ballots, the voter service center officials shall, as to each separate official ballot, also determine and record the number of totally blank ballots and the number of questionable ballots.

16-28 Declaration of results. When the voter service center

officials have ascertained the number of votes given for each candidate they shall make public declaration of the whole number of votes cast, the names of the persons voted for, and the number of votes for each person.

16-29 Tally sheets. The tally sheets used in counting the ballots cast shall be marked and handled in a secure fashion prescribed in rules and regulations promulgated by the chief election officer in accordance with chapter 91.

Also I am looking at the Office of Elections Website on Election Security and saw these questions and answers. The answers on this website do not necessarily align with what I have been told by the County.

“How do you ensure election officials don’t throw away ballots? Ballots are always transported and processed in the presence of Official Observers. Official Observers serve as the “eyes and ears” of the public and monitor that election officials are maintaining the security and integrity of the elections. Additionally, the number of ballots received and counted are reconciled at the end of each day to ensure there are no discrepancies.”

This was the answer given to me regarding this issue from Lyndon Yoshioka. [“As noted during our meeting on Wed, 1/11/23, the chain of custody process utilized by our office, including any documentation, was developed for our own internal use and is not mandated by Hawai’i law.”](#)

Will the County of Kauai Keep a daily auditable chain of custody logs for future elections?

I look forward to hearing from you.

Thank you, Matt, I would like to partner with you to ensure that the County of Kauai is following these statutes especially HRS 16-21 and HRS 16-25. These statutes address my concerns in item 1 and 6 of my e-mail below. As the chief legal adviser and legal representative of all county agencies and departments, including the county council and the office of the mayor it is in your purview to advise the County Clerk and the Office of Elections to run an election in conformance with HRS 16-21 through HRS 16-25 as you stated below.

HRS 16-21 states that a paper ballot voting system means the method of recording votes are counted manually. Currently the Ballots are counted by a machine. Ballots should be sorted, and hand counted by precinct.

HRS 16-25 order and method of counting. This statute further specifies each ballot shall be counted and finished as to all the candidates thereon before counting a second and subsequent ballots. This would address partial ballot audits by hand counting all races on ballots.

In addition, I would like to discuss items 2,3,4,5,and 7 with you. As these would be positive steps for

the county to address and remedy and would help restore trust in our elections.

Please let me know when it would be a good time to meet.

Reference:

HRS §16-21 Definition. "Paper ballot voting system" means the method of recording votes which are counted manually.

HRS §16-25 Order and method of counting. Each ballot shall be counted and finished as to all the candidates thereon before counting a second and subsequent ballots. The ballots shall be counted by teams in the following manner only: by one election official announcing the vote in a loud clear voice, one election official tallying the vote, one election official watching the election official announcing the vote and one election official watching the election official tallying the vote. The election official doing the announcing or tallying and the election official watching that official shall not be of the same political party.

Sincerely

Ralph Cushnie

Subject: RE: Elections Process

Hey Ralph,

Based upon the points you highlight below I believe the main disconnect is on what voting system is currently being utilized by the state. The last election was a paper ballot election subject to HRS section 16-21 through 16-29. It was not an electronic voting system election. So HRS 16-42 does not apply. A screenshot of the laws are below, I would recommend looking at HRS 16-1, 16-2, and then 16-21 through 16-29.

Thanks,
Matt

Matthew Bracken

Subject: Elections Process

CAUTION: This email originated from outside the County of Kauai. Do not click links or open attachments even if the sender is known to you unless it is something you were expecting.

Hi Matt,

Thank you for taking my call on Friday. Here is a bullet point list of items that I would like you to investigate.

Having a transparent auditable election is an essential element to the democratic process that forms our constitutional republic. Please contact me if you have any questions via e-mail or my cellphone 808 645-0955.

1. HRS 16-42 (b) (3) The County and State are performing audits of 10% random sample of precincts using **ballot images** to hand count one or two races on the ballot instead of comparing the paper ballots to the output of the electronic voting machines, and Hand counting all races on the paper ballots. The original paper ballots are the voter verifiable paper audit trail. The audit is controlled in its entirety by Hart Inter-Civic. Ballot images and the election results are produced by Hart Inter-Civic. Third party computer experts are not allowed to look at the source code.

"Voter verifiable paper audit trail" means the paper record that constitutes a complete record of ballot selections that is verified by the voter. The record may also be used to assess the accuracy of the voting machine's electronic record and to verify the election results.

As per HRS 16-42 (b)(3) The chief election officer conducts a post-election, pre-certification audit of a random sample of not less than ten per cent of the precincts employing the electronic voting system, to verify that the electronic tallies generated by the system in those precincts **equal hand tallies of the paper ballots** generated by the system in those precincts; and

After being challenged the Office of Elections initiated a change to the Law by submitting HB132 and SB180 and that would allow the use of ballot images and partial audits. This change was rejected by the legislature and current audit procedures are not allowed. The statute must be interpreted by is plain reading.

2. Chain of custody. The County has a Place of Deposit Collection Procedure Manual. Election observers travel to drop boxes to collect ballots and fill out these forms in accordance with the manual. A 10% discrepancy was discovered with the reported number of ballots received by the State and County for the 2020 election. After being questioned about this, the Kauai office of Elections declared that they are not able to keep accurate records of total number of ballots received by the County.
3. Are election observers and the public being misled to think accurate ballot counts are being kept?
4. Signature verification. According to observers about 10% of signatures clearly did not match. These ballots went to a secondary screening process that observers were not allowed to witness. All but less then 200 ballots were approved by the end of the 2022 general election. Observers should be allowed to see the third signature that convinced the secondary screening analyst that the ballot signature was valid. If a different signature was found for that person, then the records should be cleaned up and only one signature should be on file.
5. Voter registration. It was reported by observers that about 10% of voter registrations that were used for signature verification did not have a signature on the registration. A voter cannot be registered unless there is a valid signature on their registration form. All voter registrations should have a signature.
6. HRS 16-42 (b) (1) what are the qualification requirements to be a qualified observer to test ,audit and perform experimental testing on the electronic voting system?

As per HRS 16-42 (b)(1) The electronic voting system is subject to inspection, audit, and experimental testing, by **qualified observers, before and after the election, pursuant to administrative rules adopted by the chief election officer under chapter 91;**

7. HRS11-172 requires audits conducted pursuant to chapter 16 to have a certified election. How can we have a certified election if audits were not conducted pursuant to statute?

Sincerely

Ralph Cushnie

Subject: RE: Drop Box Info 2020 election

Aulii, The State OE counted 3379 more ballots than the County has recorded as received. This is over 10% of the total vote. This difference could have a large impact on races such as County Council. Was there an investigation done? Is there any accounting for why there is a difference? The County is responsible for receiving envelopes and verifying signatures. The County reported 2350 ballots cast in person plus 28,352 cast via drop box and mail totals to 30,702 ballots. The State OE reported 34,081 ballots counted. Where did the extra 3,379 ballots come from? How were they received? How were they compared to the registered voter rolls? Please provide chain of custody for the 3379 ballots.

Subject: Re: Drop Box Info 2020 election

Dear Mr. Cushnie,

The County of Kauai has forwarded us your questions concerning the counting of ballots as our office is statutorily responsible for such matters. With that in mind, below are our responses to your questions:

At what stage are the envelopes separated from the ballots?

Return identification envelopes containing the ballots are transferred to the counting center. Once at the counting center, ballots may commence being separated from the return identification envelopes. HRS § 11-108.

If envelopes received plus in person votes is less than ballots reported how were the remaining ballots matched to the registered voter list?

What you are referring to is an overage. This occurs when there are "more ballots than documented usage indicates." An underage, in contrast, occurs when there are fewer ballots. Both circumstances are documented by officials. There is no exhaustive list of how an overage or underage can occur.

Please note that election officials review whether there is a pattern in relation to the overages or underages that could indicate fraud or a significant operational issue and will take appropriate steps depending on what the pattern indicates.

Aloha,
Aulii Tenn

Good morning, Lyndon, and Jade, I would like to meet again at your earliest convenience. I would like to work with you to develop and improve on accurate measures of counting and reporting ballot envelopes received. Drop box plus USPS plus Walk in Voting Center and the process used to confirm registered voters are marked as voted. At what stage are the envelopes separated from the ballots? If envelopes received plus in person votes is less than ballots reported how were the remaining ballots matched to the registered voter list? I look forward to working with you on this please let me know your availability.

Cc: Jade Tanigawa <jtanigawa@kauai.gov>
Subject: RE: Drop Box Info 2020 election

Lyndon and Jade, how is chain of custody used to tally ballots received? What is the certification process of ballots received? If accurate counts are not kept, how would we know if something nefarious did happen (without county officials' knowledge)?

There are three ways to receive ballots. Should Ballots received be tallied to get an exact count? Can that count be compared to computer printout?

Drop Box: It is my understanding that drop box ballots are picked up with official observers from both parties. There is a chain of custody procedure. Records are made of each drop box every day. Records are tallied to a spread sheet to get an exact count. Please confirm

Walk in voting service center: voters come in to vote, records are kept getting an exact

count. Please confirm

USPS: I do not know what this procedure is. Does the USPS provide a receipt for how many ballots they deliver each day? Is there a process to confirm how many ballots were received each day by the elections division? Please explain procedure.

Summary: Please explain how the counting process is certified. Should there be daily documented (Chain of Custody) evidence of receipt from each category. Drop Box, Walk in, USPS. Could these numbers be added together to get an exact count of ballots received. Can these numbers be compared to election machine counts? Should the number of ballots received (with Chain of custody) be equal to ballots counted by machines. Please confirm.

Will this be done for the 2022 primary election?

Lydon, Jade, I need to let the public know about this. I do not think it is possible to miscount (or not count) 1 out of every 10 envelopes that was received by your office. **The counts taken were intended to provide our office with a rough number of envelopes received so we could estimate the number of outstanding envelopes and use this count to properly allocate resources. To imply that a discrepancy in this count and the number of ballots counted is a sign that something nefarious has occurred is wrong.** Could the voting machines play a role in this discrepancy without county officials knowing? **No.**

Voted ballot envelope chain of custody:

- Voter > USPS > Election Division
- Voter > Dropbox > Election Division
- Voter > Election Division (in-person drop-off at service window)

The discrepancy is likely due to inaccurate manual envelope counts over time. I will check with staff and get back to you.

To: Ralph Cushnie <ralph@cushniecci.com>; OE.Elections <elections@hawaii.gov>
Subject: RE: Questions On November 13 2023 Election Commission Meeting Agenda

Dear Mr. Cushnie,

This is written in response to your email, dated January 5, 2024, concerning various legal questions and conclusions you have about what the law requires regarding the accountability and security of ballots. As our office is not authorized to provide you legal advice, we cannot engage in the legal discussion you appear to be seeking.

Additionally, we would note that similar to how we do not disclose "[g]overnment records that, by their nature, must be confidential in order for the government to avoid the frustration of a legitimate government function" under HRS § 92F-13(3), we would not discuss such matters.

Specifically, elections in general and ballots in particular are considered critical infrastructure, which by their nature must be confidential in order for the government to avoid the frustration of a legitimate government function. This critical infrastructure includes the voting system that generate copies of the ballots in the form of ballot images, which your email asks questions about. Additionally, it includes matters related to the accountability and security of the ballots.

With that in mind, in order to safeguard critical infrastructure, the State's practice is to not disclose IT security methodology, activities, data, including equipment and software employed, along with matters concerning the accountability and security of ballots, because doing so could, among other things, advertise possible vulnerabilities or create the possibility of altering election results. Additionally, the State is obligated to take appropriate steps to safeguard proprietary and confidential materials designated by a vendor.

Consistent with safeguarding critical infrastructure and not providing you legal advice, we provided you a general overview of the tracking and reconciliation of voted ballots that I will summarize below for purposes of this email.

The summary included pointing out that the number of voters who returned a valid return identification envelope or checked into a voter service center were compared to the number of ballots counted.

The summary noted, in both cases related to voting, entries are made in the statewide voter registration system reflecting that the ballot has been validated by the county clerk (i.e. the information on the return identification ballot has been validated or the voter was validated as part of the in-person voting process at the voter service center). This constitutes a running record of all validated return identification envelopes and voter service center ballots that can be subsequently counted or accounted for at the state counting center.

Further, the summary noted that the county clerks secure the ballots at their offices and subsequently transfer custody to the state counting center. Consistent with this, the Counting Center Manual reflects that custody of the ballots is obtained from the county clerks (i.e. "Ballots are transferred to the counting centers in the presence of Official Observers, who serve as the "eyes and ears" of the public"). Counting Center Manual at page 3. The topic of "Receiving Return Envelopes" is addressed beginning on page 100, while the topic of "Receive Materials from Voter Service Centers" is addressed beginning on page 141.

Continuing on, the summary noted that after taking custody of the ballots from the county clerks, throughout the Counting Center Manual there are references to certifications of sealing and unsealing, control packets, and procedures that are followed. The Counting Center Manual provides at page 3 that "Official Observers are required to be present during the counting of ballots to ensure the security and integrity of the election."

In addition to the summary and the Counting Center Manual that you were provided, the email directed you to the county clerks concerning your questions about their operations prior to their transferring of custody of the ballots to the state counting centers. As with this email, we expect that the county clerks may be able to provide you general information about their operations, but that any information provided will not cross the line of undermining the safeguarding of critical infrastructure or involve delving into the provision of legal advice.

Thank you,
Nedielyn

Subject: [EXTERNAL] RE: Questions On November 13 2023 Election Commission Meeting Agenda

Nedielyn, thank you for responding. Please answer all the sentences followed with a question mark. Regarding my first question I am specifically asking how the Office of Elections follows HAR 177-453 Accountability and security of ballots? You seem to be saying that validation by the county clerk (signature verification) is the same as Chain of Custody documentation. They are distinctly different.

HAR 3-177-453 **(a)** The chief election officer or designated representative shall maintain a complete count of marksense ballots. All ballots shall be safeguarded to prevent mishandling or misuse.**(b)** The clerk shall maintain a complete and current count of all marksense ballots issued, spoiled, and received in their county. The accounting of marksense ballots by the clerk shall be recorded on forms prescribed by the chief election officer.

Per this Administrative Rule Chain of Custody forms are required to be filled out by the Counties and the State. Chain of Custody forms should be kept starting when ballots are picked up from drop boxes and mailboxes. There should be an accounting of ballots issued, spoiled, and received in their county. This is not being done. The County of Kauai does not keep accurate chain of custody documentation and has stated it is not required and rough counting is done to allocate manpower.. It is my understanding that the other counties do not either. The importance of Chain of Custody has been brought up in multiple election Commission meetings and was highlighted in Scotty Andersons February 10, 2021 letter to the legislature prioritizing “Verifiable chain of custody of ballots at every stage of transportation and handling;”. It seems that the Office of Elections has not taken this seriously and is only relying on a centralized accounting system(signature verification) with no checks and balances and numerous gaps of time without out chain of custody records. Does the Office of Elections require the Counties to present its chain of custody records including how many ballots were collected, how many were spoiled, How many blank ballots were returned etc?

Are ballots subject to the State of Hawaii rules of evidence to be legally counted?

The office of elections website presents this question and answer under voting security.

“ How do you ensure election officials don’t throw away ballots?

Ballots are always transported and processed in the presence of Official Observers. Official Observers serve as the “eyes and ears” of the public and monitor that election officials are maintaining the security and integrity of the elections. Additionally, the number of ballots received and counted are reconciled at the end of each day to ensure there are no discrepancies.”

The number of ballots received are not counted or reconciled at the end of each day to ensure there are no discrepancies. If HAR 177-453 is not being followed how will the office of elections answer this question? **(How do you ensure election officials don’t throw away ballots?)**

A full review of these procedures needs to be conducted.

The rest of my questions are specifically addressed to the Office of Elections and are not questions for the counties. Please answer the remaining questions.

What is the legal definition of a Ballot Image?

Please explain how Ballot Images are locked and unlocked and what is its purpose?

Please forward this to the Elections Commission along with your answers.

Thank you for your time.

Ralph Cushnie

To: Ralph Cushnie <ralph@cushniecci.com>; OE.Elections <elections@hawaii.gov>

Subject: RE: Questions On November 13 2023 Election Commission Meeting Agenda

Dear Mr. Cushnie,

The tracking and reconciliation of voted ballots is based on the number of voters who returned a valid return identification envelope or checked into a voter service center as compared to the number of ballots counted.

In both cases related to voting, entries are made in the statewide voter registration system reflecting that the ballot has been validated by the county clerk (i.e. the information on the return identification ballot has been validated or the voter was validated as part of the in-person voting process at the voter service center). This constitutes a running record of all validated return identification envelopes and voter service center ballots that can be subsequently counted or accounted for at the state counting center.

The county clerks secure the ballots at their offices and subsequently transfer custody to the state counting center. Consistent with this, the Counting Center Manual reflects that custody of the ballots is obtained from the county clerks (i.e. "Ballots are transferred to the counting centers in the presence of Official Observers, who serve as the "eyes and ears" of the public"). Counting Center Manual at page 3. The topic of "Receiving Return Envelopes" is addressed beginning on page 100, while the topic of "Receive Materials from Voter Service Centers" is addressed beginning on page 141.

After taking custody of the ballots from the county clerks, throughout the Counting Center Manual there are references to certifications of sealing and unsealing, control packets, and procedures that are followed. The Counting Center Manual provides at page 3 that "Official Observers are required to be present during the counting of ballots to ensure the security and integrity of the election."

Expanding on one of your questions concerning the verification of the number of ballots provided by the county clerks to the state counting center, we previously noted that one of the features of the statewide voter registration system is that it tracks the ballots that will be transferred to the state counting center. Specifically, the number of ballots reflected in the statewide voter registration system is verified or specifically reconciled against the number of ballots counted in the state counting center.

This is due to the fact that the voting system counts how many ballots have been received at the state counting center from the county clerks. This number is verified or reconciled against a report from the statewide voter registration system.

Another question you raised was about whether ballots and envelopes are counted separately and reconciled. However, this is encompassed within the earlier question. Specifically, as previously noted, the count from the statewide voter registration system is made up of both return identification envelopes and voter service center ballots. Whether a voter used a return identification envelope or voted a ballot at a voter service center it is reflected in the system. The reconciliation process takes into consideration whether differences could reasonably be understood to be the result of what is referred to as an "invalid ballot" from a previously validated return identification envelope or a similar reason. The definition of an invalid ballot is as follows:

An invalid ballot does not meet the requirement for the ballot to be counted. Invalid ballot scenarios include 2 ballots in the return envelope or secrecy sleeve, or the return envelope or secrecy sleeve is empty. The Ballot Opening Team handles invalid ballots. Counting Center Manual at page 316.

In reviewing your remaining questions, they appear to be focused on county operations. Specifically, they appear to be centered on how the return identification envelopes and voter service center ballots are accounted for while in the possession of the county clerks before custody is transferred to the state counting center associated with their county. Given this, we would refer you to the county clerks for an explanation of their procedures.

Thank you,
Nedielyn

Subject: [EXTERNAL] Questions On November 13 2023 Election Commission Meeting Agenda

Hello Office of elections and Mr. Nago, I submitted following questions for the November 13 2023 EC meeting and I have not received a written response. Please answer the questions that were submitted. Also please forward this to email to the commission members.

Ralph Cushnie

OE.Elections Subject: [EXTERNAL] Testimony for Elections Commission meeting Date: Monday, November 13, 2023 9:43:36 AM

Hello office of elections I have the following questions.

Does the office of elections require chain of custody documentation to be kept on ballots ?

Do ballots qualify as “evidence” per the Hawaii Rules of Evidence ?

Is a ballot image an exact duplication of a ballot?

What is the legal definition of a ballot image?

Please explain how ballots are locked and unlocked and what is its purpose. “following the election, the ballot images are locked so that they are only available for review. Specifically, no further

action can be taken – including resolving voting errors or writing vote data for tabulation.” Can ballot images be altered to decide voter intent before they are locked?

Under the rules of evidence, Authentication may require not only proof of identity but also evidence that the item remains unaltered, do ballot images qualify under this rule?

Subject: [EXTERNAL] TESTIMONY re: Elections Commission Meeting - January 16, 2024

Aloha Chair and Members of the Election Commission,

Thank you for the opportunity to testify at the EC meeting scheduled for Tuesday, January 16, 2024.

I received this email notification at 8:03 AM today. In order to meet the testimony submission deadline requirements of 2 business days prior to the meeting, I would have to submit before 4 PM today. May I please request a grace period beyond the deadline as this was an unusually short notice?

I'm on another island caring for my mom after a medical emergency so I don't have access to my reference documents.

I would also like to attend the meeting via Zoom.

TESTIMONY

Subject: Chain of Custody

The Chain of Custody in elections ensures the security of the ballot.

The Hawaii Revised Statutes regarding elections provides for the security of ballots.

In my previous two EC testimonies, I noted my observations at the Drop Box in Mililani Mauka pertaining to the lack of chain of custody during the 2022 election. I sent a certified letter to the Chief Election Officer, Mr. Scott Nago expressing my concerns and audit request in November 2022. I have not received a response. This is unacceptable.

The people of Hawaii are entitled to a secure and transparent election process.

Respectfully,

Jamie Detwiler
President, Hawaii Federation of Republican Women
2022 House District 37 Candidate (Mililani-Waipio Gentry-Koa Ridge)

REPORT AND ANALYSIS

OF THE

2022 GENERAL ELECTION

CAST VOTE RECORD (CVR)

Adriel C. Lam
Kaneohe, HI

January 11, 2024

State of Hawaii Elections Commission
Office of Elections
802 Lehua Avenue
Pearl City, HI 96782

Aloha Commissioners,

As a young US Army lieutenant in Korea, I learned a valuable lesson about inventory control in my early career. Meals-Ready-to-Eat (MREs) were a top black-market item, especially valued by Korean fishermen on their arduous sea expeditions. Every combat unit maintained a war stock and was required to take a monthly inventory of their MRE stock by a designated officer. One month, the inventory officer decided to check the contents of a box. Surprisingly, the box, though sealed, was emptied entirely of its contents. Moreover, the rest of the boxes fell with a simple push as the rest of the boxes were also empty and the entire stock of MREs unaccounted for. It was estimated that the MREs had been missing for at least 6-8 months.

When the Office of Elections released the 2022 General Election Cast Vote Record, an inventory of 419,363 individual electronic files for each ballot cast in the 2022 General Election, 52,280 additional files were also included in the release. These additional files appeared to be the latter half of the Maui County ballot. The problem is there were actually 52,543 ballots recorded to have been cast for Maui County. Moreover, within the batches of Maui ballots, there were 747 mismatches of front half ballots lacking latter half ballots, and vice versa.

Although the inventory of 419,363 ballots are accounted for by 419,363 individual electronic files, the inventory record contains a rather odd recordkeeping of duplicate ballot batch numbers and gaps in ballot sequence numbers. Batch ID numbers unique to each County were used more than once 69 times. In the individual ballot batches, there were at least 544 instances of ballots missing in the sequence numbers.

This inventory record of our election ballots, like the MRE boxes, has all the pretense of security and completeness without the contents to assure standards of security or accountability. This inventory problem is not just about election integrity, it's about basic integrity in any type of recordkeeping. I would ask any auditor or financial executive if these types of anomalies would be tolerated within their organization without a satisfactory explanation.

I ask the Commission to provide a proper and public response to these issues. The bedrock principle of "government instituted among men deriving their just powers from the consent of the governed" is in question and the people have the right to know whether their votes are properly accounted for. The Office of Elections has also yet to provide a satisfactory response for the lack of a Cast Vote Record for the 2020 General Election.

Aloha ke Akua,

Adriel Lam
Kaneohe, HI

Data Summary and Batch Data for Hawaii County CVR	10
Data Summary and Batch Data for Maui County CVR.....	20
Data Summary and Batch Data for Honolulu CVR	34

Summary of 2022 General Election Cast Vote Record (CVR)

The Cast Vote Records (CVR) is an electronic inventory of all ballots cast in an election and can be used to replicate the counting of ballots as it occurred. Conceptually, each ballot is scanned and a data file is created to represent each of the 419,363 ballots recorded for the 2022 General Election.

On Feb 22, 2023, the Office of Elections provided access to the CVR which consisted of 471,643 individual data files. There were 52,280 extra data files more than the 419,363 ballots recorded in the CVR which appeared to be data files for the latter half of Maui ballots. The data files were sorted by time and date of recording and compiled for analysis. The following table represents the CVR ballot count by County and method of voting in comparison to the officially reported results.

County	CVR Total	CVR mail-in	CVR walk-in	Off. Total	Off. mail-in	Off. walk-in
Kauai	24,908	23,467	1,441	24,908	23,466	1,442
Hawaii	64,718	61,608	3,110	64,718	61,608	3,110
Maui	52,543	50,213	2,330	52,543	50,213	2,330
Honolulu	277,194	267,387	9,807	277,194	267,387	9,807

The attached spreadsheet conducts further analysis of the ballot batches for internal consistencies in batch numbering and ballot sequence numbers within each batch. Kauai County (4 pages), Hawaii County (9 pages), Maui County (13 pages), and City and County of Honolulu (30 pages) list all the batch numbers by date and time, the highest sequence number in each batch, the number of ballots in each batch and additional notes from the analysis.

Key Notes:

The 2022 General Election CVRs exhibits questionable record keeping where the same ballot batch numbers were used multiple times, ballot sequence numbers were missing within batches, and ballot batch numbers were recorded out of sequence.

In Kauai, 10 batch numbers were used twice on the same day, each with unique ballots and varying in batch size.

Hawaii County also has 10 batch numbers used more than once, with Batch #2, #4, #6, and #7, and #10 reused on 10/29/22, the first day of counting, and Batch #1, #3, #5, #9, and #9 reused on 11/8/22, Election Day.

Hawaii County Batch #124 had only one ballot recorded in the batch with a sequence number of #153, without sequence number #1 through #152. There are total of 171 missing sequences numbers internal to Hawaii County ballot batches.

Maui County had 52,280 back side files, that is 263 files less than the 52,543 ballot files recorded and officially reported. There were 310 batches that had more ballot files than backside files, with at least 437 files that do not have a matching backside file. There were further 152 batches that had more back side files than ballots files.

In addition to multiple use of the same batch numbers in Honolulu County, there are at least 370 ballot records missing from the batch sequences, as batch sizes can range between 1 ballot to 327 ballots or more.

Data Summary of Kauai County Cast Vote Record

Batch Numbers used twice: Batch #1, #2, #3, #4, #5, #6, #7, #8, #9, #10

Missing sequence numbers: 3

Batch#	Missing Seq	Batch#	Missing Seq	Batch#	Missing Seq

January 12, 2024
EC Testimony for January 16, 2024 Meeting
Corinne Solomon
Oahu Resident

Aloha Elections Commission Chair Curtis and EC Members,

Thank you for the opportunity to submit testimony. My testimony relates to Agenda items VII, IX, and XI.

I was notified of this meeting at 8:03 on January 11th. Sunshine law requires testimony to be submitted two working days prior to public meetings.

I request that you graciously provide an extension for testimony submission, as two working days before the meeting would mean that testimony needed to be submitted yesterday, the same day I received notice of the meeting.

In 2022 Samantha DeCorte lost the Senate District 22 race by 40 votes.

When following the DeCorte campaign's effort to contact voters who needed to cure their ballots for signature issues, it was brought to my attention that, while Hawai'i law requires that a "reasonable effort" be made to contact voters to cure their ballots, the methods used are not uniform across counties. Some counties send letters while others make phone calls to voters.

I set out to collect statewide data from voters whose ballots were NOT cured to see if there was a difference in curing rates based on the method that counties used to contact voters.

The main objective of the data collection was to compare curing rates county by county from at least two counties for races where voters received letters that they needed to cure their ballots vs. phone calls. I started with DeCorte's district and mailed one-page surveys to each registered voter in SD22 whose ballot was not counted due to unresolved signature issues.

I had an approximate response rate of 10%.

The responses surprised me, and based on the responses I pivoted the data collection objective from statewide to collecting more data within Honolulu county. I sent the same data collection survey to voters in HD19 and HD20 whose ballots were not cured, again with an approximate response rate of 10%.

Across all three districts, this is what I found that surprised me:

1. Several voters said they were never contacted to cure their ballots, and did not know that their ballots were not counted

2. Some surveys were returned from USPS as “undeliverable”, even though the voter’s registration mailing address was used as the survey mailing address. (This is the same address to which ballots are mailed).
3. Some residents responded that they did not vote in the 2022 election

These brings to light several issues of grave concern with our universal mail-in election system:

Does the fact that counties use different methods to contact voters to cure ballots disenfranchise some voters over others? Do we need to amend the curing laws to change “reasonable effort” to something more specific, such as each city or county clerks office shall attempt to notify voters both by phone call(s) and a letter?

Why and how are ballots successfully mailed to “undeliverable” addresses? How many instances of this are occurring?

Will the county clerks positively respond to UIPA requests for this information?

I would like the counties to make public the number of ballots that are returned from USPS undeliverable addresses, and the number of ballots from these addresses that were counted as voted.

How are ballots being submitted from a voter’s registration address in an attempt to vote in their name? This would not have been brought to the attention of the public without a survey having been sent out.

Observers are not allowed to observe the signature verification process in Honolulu County.

Automated Signature verification settings can be adjusted to different sensitivity levels to allow what passes for a match. Public records requests for the settings and guidelines related to parameter setting choice and rationale have been denied.

Without transparency on the signature verification process, how can we trust that settings are not adjusted to allow for nonmatching signatures to get a “pass”?

Citizens should be allowed to observe all aspects of elections. For states with universal mail-in elections, signature verification is the main safeguard we have. Hawai’i needs to stop hiding this process from the public.

I look forward to the Election Commission investigating these concerns.

Sincerely,

Corinne Solomon

To the Hawaii State Elections Commission,

I am asking the members of this commission to fulfill your specific obligations under HRS 11-7.5 to “Investigate and hold hearings for receiving evidence of violations and complaints” and also to “Advise the Chief Election Officer on matters relating to elections” in regards to election issues that were discovered in the 2020 and 2022 Primary and General Elections in Kauai County.

1) Lack of Ballot Chain of Custody: It was confirmed in writing by Ralph Cushnie, a member of this Election Commission, that the Kauai Elections Division was not able to provide accurate counts and chain of custody for the daily number of Ballots received by the Kauai Elections division from drop boxes and the U.S.P.S. for both the 2020 and the 2022 elections. I previously submitted a complaint on this issue in September 2022 but the Chair at that time would not take it up. This lack of proper chain of custody on Kauai is unacceptable and a violation of HAR 3-177-453 which states,

(a) The chief election officer or designated representative shall maintain a complete count of marksense ballots. All ballots shall be safeguarded to prevent mishandling or misuse.

(b) The clerk shall maintain a complete and current count of all marksense ballots issued, spoiled, and received in their county. The accounting of marksense ballots by the clerk shall be recorded on forms prescribed by the chief election officer.

The Kauai Elections Division should be able to provide accurate counts of the ballots they receive as I have personally confirmed that there are daily logs that are kept by the workers that pick up the drop box ballots and there is a postal receipt by weight for the daily ballots received from the U.S.P.S.. The ballots are also scanned daily for the signature verification process which also provides a count. If the Kauai Elections Division can't provide an accurate count of the ballots they receive Kauai voters can not have any confidence that extra ballots have not been added or subtracted. Every Hawaii County should have accurate counts and proper chain of custody for the daily ballots they receive that can be independently verified.

2) Signature Verification: I have confirmed that the Kauai Elections Division was the only County in the state that allowed observers from political parties to watch the signature verification process and that the other counties did not allow it. This is also unacceptable. This Elections Commission needs to advise the Office of Elections to make sure every Hawaii County is able to have observers from the political parties present so they can see if there are any issues with the signature verification process. On Kauai we did have a serious issue where approximately 10% of all ballots did not have a corresponding voter signature on file to compare to (Exhibit A). This meant that the signature verification process for thousands of ballots could not be observed by our Kauai Observers and were done by a supervisor.

3) HRS 16-42: This Elections Commission needs to advise the Office of Elections to perform the HRS 16-24 post election pre-certification audit in every county with the actual paper ballots and not the ballot images. The reason for this is that voting machines and ballot images can be hacked or corrupted (Exhibit B). Kauai County was able to do the HRS 16-24 audit with the actual paper ballots because we asked that the ballots that were previously sorted by precinct at the Elections Division be kept sorted in the counting process. If Kauai was able to do this audit correctly and timely there is no reason it can be done correctly in every county. The only way for Hawaii voters to have confidence that our vote totals are accurate is to do the post-election pre-certification audits with the paper ballots which is the “voter verifiable paper audit trail”.

I would like to request time to give oral testimony at the January 16, 2024 meeting.

I greatly appreciate your attention to these matters.

Sincerely,

Thomas Stanton
Hawaii Republican Party District 15 Chair
Kauai Election Integrity Chair

Affidavit of an Official Observer in the 2022 Primary and General Elections

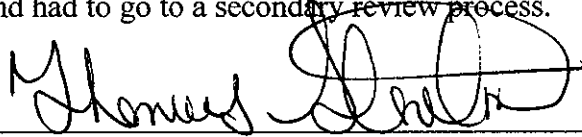

I, Thomas Stanton, am writing this as testimony to my personal experience as an Official Observer in both the 2022 Primary and General Elections for the County of Kauai. My role was to observe the signature verification process for the ballot envelopes received by the Kauai Elections Division.

In the Kauai 2022 Primary Election I observed that a large percentage of ballot envelope signatures reviewed by the Kauai Elections Division did not have a corresponding signature on file for the Elections Division workers to compare to. This was also confirmed by other Official Observers. I asked an Election Division official what would happen to these ballots and was told that they would be reviewed by a supervisor and that the signature verification for those ballots could not be officially observed.

When it was time to observe the signature verification process for the Kauai 2022 General Election I and other Official Observers decided to count the actual number of ballot envelopes that did not have a voter signature on file to compare to. The result was that a consistent percentage of approximately 8-12% of all ballot envelope signatures did not have a voter signature on file to compare to or that could be officially observed.

I also additionally observed that approximately 3-5% of all the ballot envelopes with voter signatures on file were mismatched and had to go to a secondary review process.

Signed: Thomas Stanton

VII. State vs. County Responsibilities

STATE vs. COUNTY RESPONSIBILITIES

The duties and responsibilities of the State and counties are primarily summarized in HRS §§ 11-110(b)(1)(A) & (B). Specifically, “[t]he counties shall be responsible for voter registration, absentee voting, voter service centers, places of deposits, and the mailing and receipt of ballots” and “[t]he State shall be responsible for the printing and counting of ballots.”¹ Additionally, HRS § 11-2 provides that the State is responsible for “public education with respect to voter registration and information.”

Depending on the topic, additional state laws elaborate on the nature of these responsibilities. Additionally, to the extent there is a federal law touching a topic, the State is typically listed as accountable under the federal law. However, the county is still responsible to comply with the corresponding state laws that necessarily ensures that the State as a whole is not in violation of federal law.

State Responsibilities

Printing Ballots – [HRS 11-110\(b\)\(1\)\(B\)](#)

- Candidate Filing, HRS 12-1 to 12-9²
 - [HRS 12-1, Application of Chapter](#)
 - [HRS 12-2, Primary held when; candidates only those nominated](#)
 - [HRS 12-2.5, Nomination papers; when available](#)
 - [HRS 12-3, Nomination papers; format; limitations](#)
 - [HRS 12-4, Nomination papers; qualifications of signers](#)
 - [HRS 12-5, Nomination papers; number of signers](#)
 - [HRS 12-6, time for filing; fees](#)
 - [HRS 12-7, Filing of oath](#)
 - [HRS 12-8, Nomination papers; challenges; evidentiary hearings and decisions](#)
 - [HRS 12-9, List of candidates](#)
- Proofing of Candidate Names, Contest, Ballot Types
 - [HRS 11-116, Checking ballot form by candidates and parties](#)
 - [HRS 12-9, List of candidates](#)

¹ These responsibilities apply to “elections by mail involving both state and county offices, or involving both federal and county offices.” In other words, every regularly scheduled Primary Election and General Election, as those elections are combined federal, state, and county elections. Having said that, there are rare situations in which stand-alone county election will occur. When that happens, the county is responsible for everything. HRS § 11-110(b)(2). As for a stand-alone state or federal election, “[t]he counties shall be responsible for voter registration, absentee voting, voter service centers, and places of deposit,” while “[t]he State shall be responsible for the printing, mailing, receipt, and counting of ballots.” HRS § 11-110(b)(3).

² The State is responsible for Candidate Filing for federal and state contests. Each individual county is responsible for their own county contests. However, the neighbor island counties assist the State by conducting candidate filing on the State’s behalf for federal and state contests.

- Political Party Qualification
 - [HRS 11-61, “Political party” defined](#)
 - [HRS 11-62, Qualification of political parties; petition](#)
 - [HRS 11-63, Party rules, amendments to be filed](#)
 - [HRS 11-64, Names of party officers to be filed](#)
 - [HRS 11-65, Determination of party disqualification; notice of disqualification](#)
- Presidential Ballot Access
 - [HRS 11-113, Presidential ballots](#)
- Ballot Order
 - [HRS 11-119, Printing, quantity](#)

Counting Ballots – [HRS 11-110\(b\)\(1\)\(B\)](#) & [Chapter 16, HRS](#)

- Operation of Voting and Vote Counting System
 - [HRS 16-41, Definitions](#)
 - [HRS 16-42, Electronic voting requirements](#)
 - [HRS 16-43, Ballot handling](#)
 - [HRS 16-44, Counting center employees](#)
 - [HRS 16-45, Official Observers](#)
 - [HRS 16-46, Counting defective ballots](#)
 - [HRS 16-47, Preparation of absentee ballots](#)
- [HRS 11-108, Counting of mail-in ballots; validity; ballots included in recounts; certification of final tabulation](#)

Voter Education – [HRS 11-2](#)

- [HRS 11-2, Chief election officer; duties](#): voter registration programs, voter registration maximization and equalization, media campaigns, voter awareness outreach

County Responsibilities

Voter Registration, HRS §§ 11-11 to 11-26, and HRS § 11-110(b)(1)(A)³

- [HRS 11-11, Registration](#)
- [HRS 11-12, Age; place of registering](#)
- [HRS 11-13, Rules for determining residency](#)
- [HRS 11-14, General county register; restrictions in use](#)
- [HRS 11-14.5, Residence address; confidentiality](#)
- [HRS 11-15, Application to register](#)
- [HRS 11-15.2, Same day in-person registration](#)
- [HRS 11-15.3, Application to register electronically](#)
- [HRS 11-15.7, Automatic registration](#)
- [HRS 11-16, Application when not made in person](#)
- [HRS 11-17, Removal of names from register, when; reregistration](#)
- [HRS 11-18, Transfer of registration on removal from one precinct to another in same county](#)
- [HRS 11-19, Registration from one county to another](#)
- [HRS 11-20, Transfers; name changes; initiated by clerk](#)
- [HRS 11-21, Change of name, transfer on election day](#)
- [HRS 11-22, Changing register; correction of errors](#)
- [HRS 11-23, Changing register; striking names of disqualified voters](#)
- [HRS 11-24, Closing register](#)
- [HRS 11-25, Challenge by voters; grounds; procedure](#)
- [HRS 11-26, Appeal from ruling on challenge; or failure of clerk to act](#)
- [HRS 11-110\(b\)\(1\)\(A\), Election expenses and responsibilities for elections by mail](#)

Mailing and Receipt of Ballots – [HRS 11-110\(b\)\(1\)\(A\)](#) & [Chapters 15](#) and [15D, HRS](#)

- [HRS Chapter 15D, Military and Overseas Voters](#)⁴
- [HRS Chapter 15, Absentee ballot requests](#)
- Signature Verification
 - [HRS 11-106, Deficient return identification envelopes](#)
 - [HRS 11-108, Counting of mail-in ballots; validity; ballots included in recounts; certification of final tabulation](#)

³ Pursuant to the Help America Vote Act, the State is responsible for a statewide voter registration system. Additionally, the National Voter Registration Act provides for list maintenance in terms of voter registration. Given existing state law concerning the responsibilities of the counties, the counties are responsible for the input of maintenance of the data, while the State is responsible for the maintenance of the hardware and software of the statewide voter registration system. Likewise, the counties are responsible for the list maintenance, while the State is responsible for the interacting with other governmental agencies, including the federal government.

⁴ The Uniformed and Overseas Citizens Absentee Voting Act establishes specific requirements to facilitate voter registration and the subsequent mailing and return of ballots by military and overseas voters. The state counterpart to this law is found in Chapter 15D, HRS, which clarifies and expands on the duties of and responsibilities of the counties for this population.
